

CLAMP MOUNT MIXERS

Introducing the New range of mixers.

AUSTRALIAN MADE, from high quality materials

QUALITY from superior design

SUPPORTED by local manufacturers

RELIABLE & DURABLE in service

LOW COST

READILY AVAILABLE

Motors and gears are of the highest standards, and meet energy efficient standards.

Available in 3 phase or single phase in all models

Nosecone with integrated shaft support bearing and lip seal. Supports the shaft loads and provides excellent sealing against oil contamination.

Shaft connection is quick and reliable.

Clamp mount features heat treated aluminium construction for light weight, high strength, and corrosion resistance.

Positioning in vessel is full 360 degrees swivel, and full 90 degrees tilt from horizontal to vertical.

Clamps to surfaces as wide as 100mm, as low as 5mm.

Fasteners are stainless steel – does not rust.

Shaft is 316 stainless steel, centreless ground as standard.

Standardized to the largest diameter available (25.4mm)

Choice of impellers to match the job, all 316 stainless steel.

High flow + high shear (“marine” propeller execution)

High flow + low shear (fluidfoil execution)

High flow in high viscosity (wide blade fluidfoil execution).
