gear drive mixer

30,000 litre water treatment balance tank

series 50
gear drive mixer

35,000 litre tank & mixer,
building and construction industry

series 65 mixer

55,000 litre holding tanks & agitators

series 65 mixer

series 75 mixers (2 off)

50,000 litre holding tanks and agitators

The Series 40 to Series 100 Agitators are also available with the choice of

- direct drives, or
- helical gear drives, or
- bevel helical gear drives (for very low profile height applications).

Mounting arrangements suit either:-

- parallel rails over the vessel by mixer mounting bridge
- circular mounting flanges directly onto vessel nozzles
- by mounting the vessel and mixer directly into a supporting frame.

Whether for

- Water Treatment
- Waste Water Treatment
- Chemical
- Building and Construction
- Food Preparation

The equipment is

- specifically designed to achieve the process duty required
- engineered with quality foremost
- highly durable in application
- easy to maintain
- offered with low capital cost
- and low operating cost.

strong and reliable
